# Improve Your Clients Overall Healthcare Spend

with **HI-Performance Networks** from Stone Mountain Risk

Traditional Preferred Provider Organizations (PPOs) contract a percentage of savings on billed charges, but this does not deliver maximum savings because pricing is inconsistent and unpredictable. In some cases, providers' services can be billed for up to 900% more than Medicare charges for the same service.

**Stone Mountain Risk's** HI-Performance Network (HPN) powered by **HI Card**, is a series of hospital facilities and providers that delivers Medicare-based reimbursement pricing.

With more transparency and price consistency, HPN gives your clients:

- Greater predictability for health plan management
- Reduced medical inflation impact
- Greater savings
- Lower out-of-pocket costs for members
- Lower deductibles and in some cases no deductible for members
- Long-term savings on premiums

**Protect Your Clients from Overpaying for Healthcare.**

**Learn More About**
